

Figure 1 shows a plot of $L(t)$ versus t . The x-axis (t) ranges from 0 to 100, and the y-axis ($L(t)$) ranges from 10 to 40. Two curves are plotted: a solid black line labeled 'Discrete' and a dashed red line labeled 'Learned'. Both curves start at $(0, 10)$ and increase monotonically, with the 'Learned' curve closely following the 'Discrete' curve.
